REMARKS

Applicants have proposed amending FIGS. 5 and 37 of the drawings to correct minor typographical errors. Applicants have proposed amending FIG. 6 to correct the mistaken omission of text in the description of Operating System Features. This omission becomes apparent when comparing FIG. 6 to its counterpart FIG. 5 (also see applicants' specification at p. 26, line 29 to p. 27, line 13).

Applicants respectfully submit that this amendment is fully supported and justified by the original specification, adds no new matter, and does not affect the disclosure or the scope of the claims. Approval of the drawing corrections is requested. In anticipation of approval of the drawing corrections, the formal drawings for FIGS. 5-6 and 37 that are submitted herewith incorporate the corrections.

Pursuant to MPEP § 608.02(r), this amendment of FIGS. 5-6 and 37 is also set forth in a separate Letter to Official Draftsperson which is being filed concurrently herewith.

In view of the foregoing, this application is in condition for allowance. An early and favorable action is requested.

Respectfully submitted,
